This webpage provides the most up-to-date information as to the status of the Florida Department of Transportation's project to improve the Beulah Road / Interstate 10 Interchange and to widen Beulah Road in Escambia County, Florida.

As shown on the map above, this “master” project to construct improvements to Beulah Road and Interstate 10 is split into 3 different segments: 433113-1, 433113-2, and 433113-3.

Beulah Road / Interstate 10 Interchange (FDOT 433113-1)

This project encompasses the widening of Beulah Road and the construction of on and off ramps, along with other minor improvements to the interchange, to enhance traffic flow on Interstate 10, Beulah Road, and West Kingsfield Road.

Currently, the project is in the property acquisition phase. FDOT expects to continue to steadily acquire the properties it needs for this project over the next year or so.

The Department is also working on more detailed maps of their plans for the interchange improvements. They expect to have these plans completed around Spring 2025.

The construction of these improvements is still unfunded, and therefore there is not yet a schedule for that phase.

Beulah Road Widening (FDOT 433113-2 & 433113-3)

The plan for these projects is to widen Beulah Road from two lanes to four lanes all the way from Issacs Lane to south of West Nine Mile Road.

Both projects are currently on an indefinite hold due to a lack of funding. However, as FDOT continues to make progress with improvements at the Interstate 10 and Beulah Road Interchange, it is likely they will also move forward with this project as well within the next few years.

We will continue to update this webpage periodically and as events dictate. If you have any questions, please contact Eminent Domain Attorneys Charles Stratton or Joshua Stratton. Charlie can be reached by phone at (850) 933-3849 and by e-mail at cstratton@bergersingerman.com. Josh can be reached by phone at (617) 739-1685 and by e-mail at jstratton@bergersingerman.com.
